

Programmable Temperature Controller *TD500*

Programmable Temperature Controller

Hanyoung Nux's TD500 programmable temperature controller is composed as a 2channel (Loop), allowing the control of each of the two devices with 1 controller. Color LCD and touch-screen for easy usage.

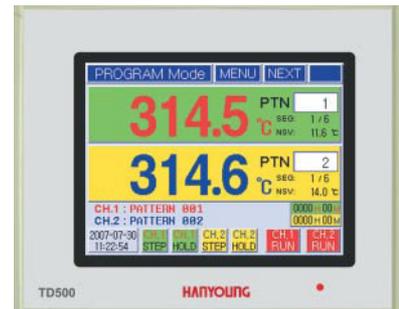

Furthermore, TD500 is consist of $\pm 0.1\%$ indication accuracy, sampling period of 500ms, 100 Segment / Pattern, total of 2400 segments, 4 points of alarm, 8 points of time signals, 8 points of contact input D.I.

1 2-Channel Programmable Temperature Controller

Model TD500 is generally built for 2channel control, but in the use of a single channel, just one screen can be used as an indicator. Furthermore, the operation screen can be selected according to the need of the 3 types of the 1st operation screen, the 2nd operation screen and the 3rd operation screen.

The 1st Operation screen (1 channel Mode)

The 1st Operation screen (2 channel Mode)

2 Group PID Group (4 Zone)

The PID GAIN for this instrument is divided into 4 group for each channel. The optimal PID GAIN can be applied for control.

PID setting screen

3 Time Signal Output

The operation mode of the Time Signal is divided to 'segment ON / OFF' or 'time operated mode'. Total of 8 time signals can be set.

Time signal setting screen

4 Contact Input (D.I)

Contact input (D.I) has a total of 8 points, modes that can be switched from RUN, RST, STEP, and HOLD.

contact input setting screen

contact input name display screen

2 Channels Programmable Temperature Controller

5 Program Pattern

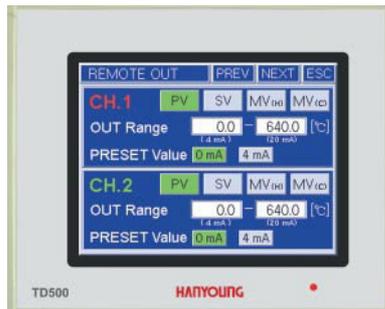

The pattern is 100 patterns, with set segments to 1 pattern per up to as many as 100 segments, with a total of 2400 segments.

Program pattern setting screen

6 Retransmission Output

A selected item can be used as 4 – 20 mA d.c. retransmission output in the 4 types of item for each channel.

Retransmission output setting screen

7 Heating/Cooling Control

The heating or cooling control can be selected between control modes by each channel.

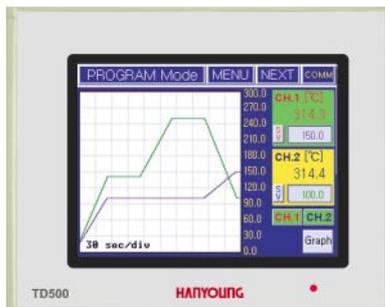

Control output setting screen

8 Other Display Screen

The 2nd operation screen (Signal status screen)

The 3rd operation screen (Graph display screen)

Alarm code select screen

FEATURES

- Touch screen color LCD screen
- 4 P.I.D zone
- Universal Input
- Time signal 8 points
- Alarm output 4 points
- Heating / Cooling control output
- Contact input(D.I) 8 points/
Contact output(D.O) 16 points
- Communication function

2 Channels Programmable Temperature Controller

SPECIFICATION

Display

Screen : Color LCD (115.17×86.37mm), 320×240 Pixel
 Dimension : 144(H)×183(W)×103(D)
 Back light : CCFL (50,000 hrs.)
 Touch type : 4 wire resistive touch screen
 Language : Korean, English
 Display channel : 2 channel (1 channel or 2 channels selectable)

Input

Number of channel	2
Accuracy	0.1% of Full Scale.
Sampling time	each channel 500 ms
Input impedance	T.C, DC voltage (mV) : 1 M Ω DC voltage (V d.c) : 1 M Ω DC current : 250 Ω (External resistor)
Effect of input signal resistance	Thermocouple : 0.4 mV/ Ω
Effect of input resistance	R.T.D : 50 Ω max. / line (Resistance is equal between lines.)
Sensor driving current	R.T.D : 300 μ A
Detection of input disconnection	Burn Out detectable
Allowable input voltage	DC voltage (mV d.c) : 5 V d.c DC voltage (V d.c) : 15 V d.c
Resolution of PV	24 Bit (Effective resolution : 9999.99)
Input Type	T.C, R.T.D, DC voltage, DC current (With attached external shunt resistor)
Memory function	Setting and operation information (built in Flash and NVRAM)
Retransmission output	Current output (4 – 20 mA)
R.J.C accuracy	Max. \pm 1.5 $^{\circ}$ C
Scaling range	-999.9 ~ 9999.9
Insulation resistance	Min. 20 M Ω , 500 V d.c (Between input terminal and ground)
Dielectric strength	2,500 V a.c, 50/60 Hz for 1 minute (Between input terminal and ground)

• Measuring range

Type	Input	Temperature range
Thermocouple	K	-200.0 ~ 1370.0 $^{\circ}$ C, \pm 0.1% of F.S. (*1)
	J	-200.0 ~ 1200.0 $^{\circ}$ C, \pm 0.1% of F.S. (*2)
	E	-200.0 ~ 1000.0 $^{\circ}$ C, \pm 0.1% of F.S. (*3)
	T	-200.0 ~ 400.0 $^{\circ}$ C, \pm 0.1% of F.S. (*4)
	R	0.0 ~ 1700.0 $^{\circ}$ C, \pm 0.15% of F.S.
	S	0.0 ~ 1700.0 $^{\circ}$ C, \pm 0.15% of F.S.
R.T.D	R100 Ω (DIN43760)	-200.0 ~ 640.0 $^{\circ}$ C
DC voltage	mV d.c	0.0 ~ 100.0 mV or -10.0 ~ 20.0 mV, \pm 0.1% of F.S.
DC voltage	V d.c	0.0 ~ 10.0 V (signal input range settable) \pm 0.1% of F.S.
DC current	4 – 20 mA	Attach an external shunt resistor (250 Ω)

(*1) : Below 0 $^{\circ}$ C : \pm 0.2 % of F.S.

(*2) : Below 0 $^{\circ}$ C : \pm 0.2 % of F.S.

(*3) : Below 0 $^{\circ}$ C : \pm 0.2 % of F.S.

(*4) : Below 0 $^{\circ}$ C : \pm 0.2 % of F.S.

Function

Setting pattern : Max 100 patterns
 Setting segment : 100 segment / pattern (Total 2400 segments)
 Segment time : 00h 00m ~ 99h 59m / 99m59s (Selection by button on screen)
 Pattern repetition : 1 ~ 999 times or endless repeat
 Wait zone : \pm 0.1 ~ 999.9 Wait zone range
 Wait time : 00h 00m ~ 99h 59m
 Time signal : Segment ON/OFF or Time setting mode
 (00hr 00min ~ 99hr 59min / 99min 59sec : According to segment time selection)
 Pattern name setting : Indicate a pattern name in Korean / English
 Start / Finish setting : Set a condition of start / finish for each channel.
 Start mode (SSV / PVI / PV2), Start setting value,
 Finish mode (RST / HOLD), End segment.
 Pattern / segment management : Copy or initialize an original pattern and segment.
 Time signal setting point : Max. 8 points
 Inner signal setting : Set a object, type, range, direction, delay time.
 Graph setting : Indicate a measuring value as graph and set a size of X axis and Y axis.
 Ramp function : Select a variation rate of setting value in Fix operation.
 Screen protection function : Set a time for automatic OFF for LCD screen.
 (Max. 99m)
 Event log : Save an event information (Max. 40 event)
 Operating time reservation : Reserve an operation start time in year, month, day, hour and minute.
 Fix control time setting (Fix run mode) : Set a operating time for fix control.
 (Max. 9999h 59m)
 Language selection : Select a language on the menu. (Korean / English)

SPECIFICATION

Control Mode

Control mode	2 Loop
Control computing function	a) P,I,D operation Auto tuning(Reverse/Direct action selection)
	b) ON/OFF,P,PI,PD operation selection
	c) Heating / Cooling P,I,D Auto tuning
Proportional band	0.0 ~ 1000.0 °C (°C is ON / OFF control)
Integral time	0 ~ 6000 sec.
Derivative time	0 ~ 6000 sec.
ON/OFF control hysteresis	0.1 ~ 1000.0 °C
Cycle time	1 ~ 1000 sec.
A.R.W(Anti reset windup)	50 ~ 200 % of P band
Manipulated value	-5.0 ~ 105.0 %
MV tracking	ON / OFF, MV change rate limit function (1.0 % / sec)
P.I.D Zone	4 groups (Level P,I,D)

•Control output

Channel 1 & Channel 2	Current output S.C.R	Output point : Heating / Cooling control output
		Output signal : 4 - 20 mA d.c
		Resistive load : Max. 600 Ω
		Accuracy : ±0.1 % of Full span
Channel 1 & Channel 2	Voltage pulse output S.S.R	Output point : Heating / Cooling control
		Output signal : ON voltage 24 V d.c
		Resistive load : Min. 600 Ω
		Minimum pulse width : 10ms
Retransmission output	Selection of output type	PV, SV, MV for heating / MV for cooling selection
	Current output	4 - 20 mA d.c (By scale setting)
	Output resolution	16 bits
	Range of retransmission output	Scaling range setting
	Accuracy	± 0.1 % of Full span
Retransmission disabled at heating / cooling control mode.		

•Alarm

Alarm setting	4 points
Type of alarm	High / Low deviation alarm etc (20 type of alarms)
Hysteresis	Setting value

•Contact output(D,O)

Contact output (D/O)	Output point	16 points (Relay : 8 points / Open collector : 8 points)
	Open collector	24 V d.c 300 mA Max, only resistive load
	Relay contact	N.O side 250 V a.c. 5 A or 30 V d.c. 5 A N.C side 250 V a.c. 2 A or 30 V d.c 1 A (only resistive load)

Contact Input(D/I)

Input point	8 points	
Channel operation at a time (1channel / 2channel)	D/I-1(RUN/RST)	
	D/I-2 ~ D/I-4(RST)	
	D/I-5(STEP/RST)	
	D/I-6(HOLD/RST)	
	D/I-7(HOLD-ON/RST)	
	D/I-8(HOLD-OFF)	
	Channel operation separately (1channel / 2channel)	D/I-1(CH.1 RUN/CH.1 RST/NONE/RST)
		D/I-2(CH.2 RUN/CH.2 RST/NONE/RST)
D/I-3(CH.1 RST/CH.2 RST/NONE/RST)		
D/I-4(CH.1 RST/CH.2 RST/NONE/RST)		
D/I-5(CH.1 STEP/CH.1 RST/NONE/RST)		
D/I-6(CH.1 HOLD/CH.1 RST/NONE/RST)		
D/I-7(CH.2 STEP/CH.2 RST/NONE/RST)		
D/I-8(CH.2 HOLD/CH.2 RST/NONE/RST)		
ERROR Input active	RUN / Always selection	
Input signal	Non-volt contact input (ON : Max. 10 Ω, OFF : Min. 500 kΩ)	

Communication

Standard	EIA-RS232C, BA-RS422/485	
Max. connection lines	RS232	1 : 1
	RS422/485	1 : 256
Communication type	RS232	Full duplex
	RS422/485	4 lines / 2 lines half duplex
Synchronization	RS232	Asynchronous mode
	RS422/485	

Power

Voltage	100 - 240 V a.c. ±10 %
Variation rate	±10 % of voltage
Frequency	50 / 60 Hz
Power consumption	Main body approx. 16 VA
	I/O board approx. 20 VA
Insulation resistance	Between terminal and ground terminal min. 20 MΩ (500 V d.c)
Dielectric strength	Between power terminal and ground terminal 2500 V a.c. (50/60 Hz, for 1 min.

Operation Environment

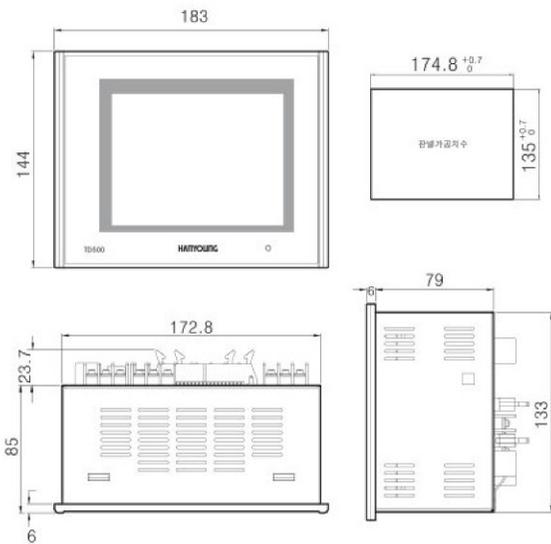

Angle of installation	Max. 30 ° for back side direction, Horizontality for left and right
Ambient temperature	0 ~ 50 °C
Ambient humidity	20 ~ 80 %RH
Vibration	10 - 60 Hz 0.2 m/s ²
Shock	None
Weight	Approx. 2.35 kg (in packing condition)

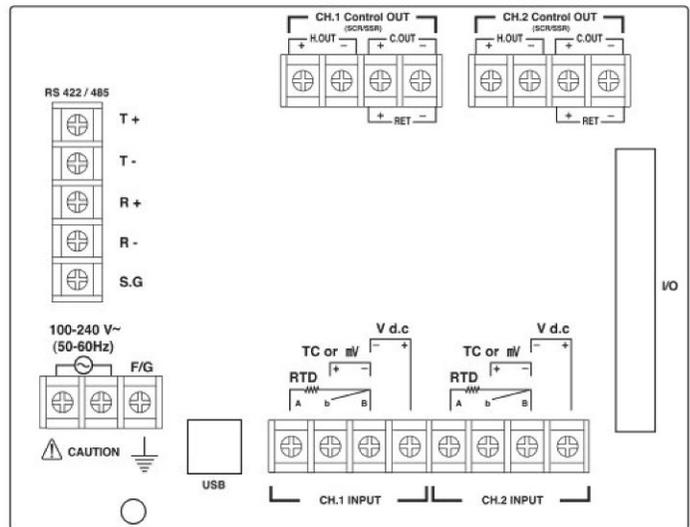

● Ordering Information

Model	Suffix code	Description
TD500	<input type="checkbox"/> <input type="checkbox"/>	Programmable Temperature controller (2 channel)
Body	N	None
	1	Communication port RS422/485 + USB
	2	Communication port RS232 + USB
I/O board	N	None
	1	SMPS, relay output 8 points, transistor output 8 points, Contact input 8 points
